

The CUNY Advanced Science Research Center (ASRC) is in Harlem at the **southeast corner of the historic and scenic City College of New York campus**, located at 85 St Nicholas Terrace. The building sits between The Towers main entrance and 85 St. Nicholas Terrace entrances. The campus is situated atop the impressive rock cliffs of St. Nicholas Park between St. Nicholas Terrace and Convent Avenue, and 130th and 141st Streets.

The center is **closest to the A/C/B/D trains at 125th street and A/C/B trains at 135th Street**. But the 1/2/3 trains are not far from the City College Campus either. Many bus lines run within a short walk to the campus – the

M3/M10/M11/M100/M101/M104 and the Bx33 all are just a few blocks from campus entrances.

To get to the Advanced Sciences Research Center (ASRC) building once you arrive at the campus, first identify your entrance based on the area map and entrance photos above. Find the matching entrance and direction block on the map below, and follow the paths with the arrows to the main entrance of the ASRC.

Enter the Advanced Science Research Center building and make a sharp left into the café. **Call the MRI team at 646-784-7851 to let them know you have arrived.** A member of the Healthy Brain Network MRI team will greet you to bring you to the MRI Suite.
